About the Job
Flutter Developer to Help Disrupt the Digital Payment Market

Atlanta-based Sionic is a leading provider of omni-commerce, verified rapid payments solutions, and the first to bring real-time payments to commerce - RTP Commerce - in the U.S. market. Our service delivers secure bank-to-bank, digital cash payments from payers to payees through mobile, online, in-store, and in-vehicle experiences. Merchants receive cash deposits in their bank accounts within seconds and bypass expensive credit card fees.

Job Description:
As a Flutter Developer, you'll work alongside our development team, contractors, and global, industry-leading partners to help deliver new commerce solutions and higher sales for retail, restaurant, and manufacturing clients. You will also work directly with our numerous partners to ensure a successful integration. We also rely on our developers to constantly innovate on how consumers engage in connected and mobile commerce in an advancing world of digital technology. We've been pioneering for many years and are thrilled to be still creating relevant technology like no one else.

Team:
We provide opportunities for developers to collaborate, learn from each other and take personal ownership of development projects and company initiatives. We foster a positive environment of diversity, teamwork, and innovation that comes from information sharing and knowledge across all departments, teams, and experience levels. We encourage critical thinking and challenge team members to look beyond, and consider not just what can be done today, but what's possible in the future. Your success is our success, and we grow and innovate together.

Skills & Requirements:
- We're hiring team members who are disciplined, passionate, and excited to work in a relaxed environment
- We're a small, diverse company and it's really important that you mesh well in our family-like culture
- Strong communication skills and the ability to deal with partners in everyday and technical terms
- Be highly motivated and maintain a positive, "can-do" attitude
- 3+ years of experience as a professional software engineer
- Proven ability to develop, support and maintain Flutter mobile applications
- Solid grasp of Flutter UI design principles, patterns, and best practices

- Familiarity with RESTful APIs to connect Flutter applications to back-end services
- Experience with cloud providers (AWS & Google Cloud)
- Aptitude and desire to learn new technologies
- Self-starter who can work independently
- Experience building mobile payment and wallet applications a plus

Technologies:
Flutter, Postgres, Google Cloud services, Golang

Company:
Based in Midtown, Atlanta, GA, Sionic is a privately held company founded in 2010. Our small staff and family-style atmosphere provides an enjoyable environment. Our pioneering spirit allows us to be dynamic and work closely together to solve problems by leveraging new technologies. We encourage creativity, accountability, and teamwork in a comfortable atmosphere.

We all have lives, so it's important that you know you're taken care of. We offer these awesome benefits especially for you:
- Flexible Schedules (based on need)
- Paid Time Off
- Work from Home Provisions (approval required)
- Ability to Work with Innovative Technology and Tech Partners
- Opportunity to Work with and Learn from Other Developers
- Flexible Family Leave
- Weekly Employee Lunches
- Weekly Employee Happy Hours
- Monthly Coworker Birthday Celebrations
- Free Beverages at Office
