

Platform Developer to Help Disrupt the Digital Payment Market

Atlanta-based Sionic is a leading provider of mobile and connected commerce services, leveraging alliances with partners to drive more consumers to offline retail clients' locations. Sionic is the first to bring real-time payments to commerce - RTP Commerce - in the U.S. market. Our service delivers bank-to-bank, digital cash payments from consumers to merchants through mobile, online, in-store and in-vehicle experiences. Our goal is to revolutionize the way consumers engage in connected and mobile commerce by delivering new commerce solutions and higher sales for retail businesses.

Job Description:

As a Platform Developer, you'll be working alongside our development team, developing back-end services and infrastructure that interface with our user-facing products, external partners, and internal tools. This includes integrating with third-party service providers and developing robust, secure, and maintainable APIs.

Technologies we use:

- Core web API in Ruby (Sinatra/ActiveRecord)
- Auxiliary services in Rust (Actix/Diesel)
- PostgreSQL
- Deployments to Google Cloud via CircleCI with Docker
- Web UI in TypeScript (React), served by Node.js (Express)
- Native iOS (Swift) and Android (Java) applications

Skills & Requirements:

- Strong communication skills and the ability to deal with people in everyday and technical terms
- Proven ability to develop, support and maintain integrations
- Collaborative development skills, and familiarity with version control tools and practices.
- Familiarity with cloud development and microservice architecture, and a good understanding of network protocols and REST API design practices
- Experience with multiple languages and willingness to learn

Team:

We provide opportunities for developers to collaborate, learn from each other and take personal ownership of development projects and company initiatives. We foster a positive environment of diversity, teamwork and innovation that comes from information sharing and knowledge across all departments, teams and experience levels. We encourage critical thinking and challenge team members to look beyond, and consider not just what can be done today, but what's possible in the future.

Company:

Based in Midtown, Atlanta, GA, Sionic is a privately held company founded in 2010. Our small staff and family-style atmosphere provides an enjoyable environment. Our pioneering spirit allows us to be dynamic and work closely together to solve problems by leveraging new technologies. We encourage creativity, accountability and teamwork in a comfortable atmosphere.

We all have lives, so it's important that you know you're taken care of. We offer these awesome benefits especially for you:

- Flexible Schedules (based on need)
- Paid Time Off
- Work from Home Provisions (approval required)
- Ability to Work with Innovative Technology and Tech Partners
- Opportunity to Work with and Learn from Other Developers
- Flexible Family Leave
- Weekly Employee Lunches
- Weekly Employee Happy Hours
- Free Beverages at Office
